Experience

Junior Software Developer (Sysadmin)   Dec 2016 - *Present*
eSolutions, Monash University

Systems administrator for the monPlan Project – which is a student developed web application designed to assist students in planning their course while undertaking studies at Monash University. In this role I have:

- Worked in an Agile Environment, where I lead scrums and retrospectives
- Coded a Python web-scraper, to scrape information off various sources of information
- Coded a backend, initially in Node.js, Express and MongoDB, eventually migrating it over to Java for use in Google Datastore
- Conducted User Experience testing with test users

Web Developer/Tech Consultant   Aug 2016 - *Present*
Camberwell High School Ex-Students Society

Other Experience Included: Team Member (Woolworths), Work Experience (Baker IDI Heart and Diabetes Institute)

Education

Bachelor of Information Technology   Feb 2016 – *Present*
Majoring in Computer Networks and Security, Minoring in Computer Science | Monash University

Volunteering

Faculty of Information Technology Peer Mentor   *Jan 2017 - Present*
Faculty of Information Technology, Monash University

Volunteer   *Jan 2017 - Present*
Wired Monash, Monash University

Projects

monPlan

https://monashunitplanner.github.io

A Student Designed Course Planner for students by students. It is currently being revamped, so that students can enrol in units.

MARIE.js

https://marie-js.github.io

A Simple, yet beautiful CPU Assembly Language simulator. Based of MARIE, it is currently used within **FIT1047: Introduction to Computers, networks and Security.**

CHS Newsletter Website

No public access

Redesigned and implemented a digital version of the school's fortnightly newsletter.
